WORK HISTORY

Project Manager, 2020 to Current **Canada Malting Company - Calgary, AB**

- Managed an \$8.5m combined heat and power plant; took the project from initiation to close, completing under budget with zero safety infractions during the COVID-19 outbreak.
- Evaluated contractors, procured equipment, and managed contracts for the external stakeholders involved. Weekly status updates as well as frequent Steering Committee meetings for the internal stakeholders.
- Executed capital cost budgets, risk assessments, schedules, and other necessary PMO documents required to execute the project.

Project Manager, 2018 to 2020 **Canada Malting Company - Calgary, AB**

- Manager of a \$7m fully automated finished product bagging line; from concept design to construction, oversaw the daily activities needed that brought new processes to the facility.
- Worked with numerous internal stakeholders from Logistics to Sales to Operations Management, ensuring phase completions, training, and handovers were executed correctly so that each department was coordinated and ready for commissioning.

Plant Engineer, 2017 to Present **Canada Malting Company - Calgary, AB**

- Oversee the maintenance department capital expenditures, yearly budgets, and assist with the three and five-year CAPEX outlay.
- Detailed focus on OPEX cost reductions through means of continuous improvement and maintenance process backed by reliability principles.

Project Supervisor, 2015 to 2017 **Canada Malting Company - Thunder Bay, ON**

- Provided support on a \$5.5m combined heat and power plant which included duties of change management, conflict management liason, status update report generations, and project documentation handler.
